# Chapter 1 Introduction

## 1.1 Overview

iVMS-4200 Client software is designed to configure and manage Hikvision devices in a unified and intuitive manner, including DVRs, NVRs, IP cameras, encoders, decoders, security control panels, video intercom devices, access control devices, etc.

The software provides multiple functionalities including live view, video recording, remote search and playback, file backup, alarm receiving, person management, access control, video intercom, security control, time & attendance, etc.

## 1.2 Components

Component	Version	Date of Release	Latest Version or Not
Player	V7.3.9.47	2020-11-07	No
Network SDK	V6.1.6.10	2020-11-12	No
ISUP SDK	V2.4.0.10	2020-10-27	No

## Chapter 2 What's New

### 2.1 Event Center

#### 2.1.1 Added Features

1. Added Wearing Hard Hat Alarm. Supports displaying person's name, credential type, and credential No., in event details.
2. Added Grey Scale Alarm and Object Thrown from Building Detection Alarm.

#### 2.1.2 Updated Feature

In Event Search module, added 2 event types under Video Intercom Event: Door Open by Force (Door Contact) event and Door (Contact) Open/Close.

### 2.2 Statistics

#### 2.2.1 Added Feature

Added Temperature Map. Supports generating temperature map of specific regions to see the overview of each region's temperature trend.

### 2.3 Person

#### 2.3.1 Added Feature

Supports connecting the card enrollment station to the PC running the client by USB interface. The card enrollment station can be used for applying cards, collecting fingerprints, etc.

#### 2.3.1 Updated Feature

Deleted Patrol Card (a card type) when issuing a card to one person.

### 2.4 System Configuration

#### 2.4.1 Added Feature

1. Supports setting retention period for keeping the event information. When the retention period expires, the event record will be deleted automatically.
2. Added enabling Save Pictures in Structure Data Format function. When it is enabled, no pictures will be displayed in Event Details field in Event Center. Also, the Delete Registered Picture field will be available in Person module. If a person's information is applied to the device(s) successfully, the person's picture will be automatically deleted and no picture will be displayed in Basic Information.

## **2.5 Others**

### **2.5.1 Updated Feature**

Deleted stream media server.

## Chapter 3 Resolved Issues

The following are issues resolved in this version.

No.	Issue Description
1	<p>When the number of channels of EZVIZ devices is over 10, the sequence of channels is wrong in Main View module.</p> <p>After solving the issue, the channels of EZVIZ devices are displayed in the sequence of channel No.</p>
2	<p>The event related pictures are mistakenly saved to the hard disk C in cases such as the computer system is not activated.</p> <p>After solving the issue, the event related pictures are saved in the User file in the hard disk C.</p>
