

Notification

With the release of new android indoor station DS-KH9510-WTE1 (B) (AKA: B version) in replace of the original DS-KH9510-WTE1 (AKA non-B version). We would like to highlight some of the following regarding firmware upgrade

B Version Use Case with Door Stations/Other Indoor Stations

Firmware of B version has the updated secure protocol 2.0 built in by default. For some existing systems the older firmware may still be in secure protocol 1.0. When you introduce B version DS-KH9510-WTE1 into an existing intercom system, or you are introducing any other type of door stations / indoor stations into a Hikvision intercom system, please use the below chart to update the firmware of units involved. Firmware can be downloaded on website.

Category	Model Number	Firmware version on or before the version listed below. If the firmware in the unit is on a later build, please skip the chart.	If firmware in the unit is on an earlier build, please download the latest new firmware via the link below	Feature of lost between firmware on column 3 older one and column 4 new one
Indoor Stations	DS-KC001	All firmware is compatible with B version indoor station
